

KETTLE CREEK PROGRAM MENU

Virtual Lessons: Live or Pre-recorded

These offerings bring Kettle Creek (KC) staff onto a screen in your classroom to work with your students on Environmental Education. The program can include demonstrations, PowerPoints, Q & A and discussion with your students.

Program Topics:

Water Cycle / Wetlands
Animal Adaptations
Pocono Habitats
Photosynthesis
Natural Cycles
Biology thru Ecology

Environmental Education on School Site

Explore your school grounds through a scientific lens in this all-outdoors program led by a KC Educator . During the activities, KC staff and participants will be wearing masks at all times and practicing social distancing as much as possible.

Program Topics:

The Life of Trees
Stream Ecology (if site is appropriate)
Mini-Bioblitz
Habitat Comparisons
Food Chain Mechanics

Traveling Discovery Trunks

Borrow a fun-filled trunk with clean hands-on discovery items and activities that can be led by a teacher, or better yet have a KC Educator Zoom in to your classroom and use the trunk as a teaching resource remotely. Trunks will contain teaching aids, lesson plans, and other resource materials.

Trunk Packages:

Pocono Wildlife
All About Trees

Virtual Field Trips

Show your students a pre-recorded visit to one of Monroe County's unique natural areas.

Field Trip Locations:

Tannersville Bog
The Pond at Kettle Creek
Habitat investigations at KC
Looking at Pocono Streams Macro-invertebrates

Kettle Creek Labs

Enhance your science curriculum and engage your students with our new program, Kettle Creek Labs! Sign up for this once a month program. A KC Educator will teach the lesson virtually and materials will be provided ahead of time for the students. The teacher will be provided with suggested follow-up activities they can do with their students on the school grounds.

Topics:

Each month will be a different environmental topic geared for your specific grade level and suggested curriculum.
